The screenshot shows a Gmail web interface. At the top, there's a navigation bar with links like 'People', 'Questions', 'Docs', 'Calendars', 'Space Admins', 'ServiceNow', and a 'Create' button. Below this, the email header shows the title 'DevOps Maturity Interview Questions' and its creation date '17 Oct 2016'. The main body of the email contains three sections of interview questions:

**Work flow (SDLC), please describe your development team's current work flow:**

- how do feature and bug reports get into your backlog?
- how is work prioritized and assigned to team members?
- how is the work tested?
- where is the work tested?
- how do you know when a task is done?
- how does the completed work get to the customer/user?
- how do you experiment to determine which solution is best?
- how do you measure customer satisfaction?
- what control do you have over the various environments in your workstream (e.g. Dev, QA, Production)

**Automation, please describe the parts of your team's workflow that are automated:**

- do you have automated builds?
- do you have automated environment configuration? (e.g. dev, qa, production)
- do you have automated deploys to any environments? If so, which environments?
- do you have automated testing?
- do you have self-healing for your product?
- does your product scale automatically?
- are there any other parts of your workflow that are automated?
- what parts of your workflow do you feel would be the most urgent candidates for automation?

**Roles, please describe the various roles in your product team:**

- Who determines the direction of development for your product e.g. what gets built next?
- Who deploys your product?
- Who assigns development tasks?
- Who determines the priority of issues or features?
- Who tests your product?
